Fire Extinguisher Service Technician

Job Type: Full Time – Permanent

Salary: To be discussed at interview

Location: Havant, Hampshire

Job Description: Field Service Engineer/Fire Extinguisher Engineer/Extinguisher Technician

Uni-Guard Fire Protection are looking for an experienced fire extinguisher technician to operate within the maintenance and servicing team. Reporting to the team manager you will be responsible for servicing, maintenance and repair of fire extinguishers.

The successful candidate will be supplied with a company van and necessary working tools.

Required Skills for the Role:

- Full driving license
- Ability to travel around the country including some away jobs which will require overnight stays
- Proven experience in fire extinguisher maintenance
- IFEDA/FIA trained
- Working knowledge of fire extinguisher servicing standards and an understanding of current British Standards
- Excellent communication and customer service skills

Job Responsibilities:

- Servicing, maintenance and repair of fire extinguishers
- Plan and organise work
- Carry out risk assessments and H&S responsibilities
- Ensure standards are maintained to current standards and maximise the operation, effectiveness and reliability of extinguishers and associated equipment
- Be proactive with maintenance work and actively seek out opportunities to secure additional works and new customers
- Maintain precise documentation of works done including expenditure and report to the team manager

If you are interested in applying for this role please send your CV with a covering letter to carly.wilcox@uni-guard.co.uk. You will also be asked to fill in an Application for Employment form.
